Empower Your Frontline Workforce with Augmented Reality Workflows
Enterprise Productivity Platform

Ubimax Frontline

Digitalize and streamline processes for your frontline workforce with augmented reality workflows – seamlessly integrated with wearables and mobile devices – increasing productivity, efficiency, and quality along the entire value chain.

What is Frontline?

**Frontline Creator**
Configure your solution instead of developing it! Our easy-to-use graphical AR authoring tool lets you create or customize your own AR workflow apps and edit user interfaces without any programming knowledge. Frontline Creator works codeless via drag & drop and point & click.

**Frontline Workplace**
Our Frontline Workplace app supports your workers in their manual work by displaying all relevant information right in their field of view. The adaptive user interface is key to being fully hardware agnostic.

**Frontline Command Center**
The central management hub allows for administrating the modular Frontline solutions, as well as managing your deskless workforce by assigning tasks or help via remote support. The web-based tool enables you to analyze KPI, overview task or device statuses and generate reports, leveraging flexibility and transparency in your shopfloor processes.

Your Benefits

- **Scalability**
  Companies can easily transfer requisites from one site to the next

- **Usability**
  Easy to use with no programming know-how required

- **Agility**
  Create and edit your AR workflow applications instantly

- **Flexibility**
  Forward task changes immediately to your frontline workforce

- **Security**
  Protect your intellectual property rights of your workflows and best practices

- **Independence**
  No external resources like additional software or hardware needed

Our Full-Service Approach

We act as a one-stop-shop by not only offering our enterprise software solutions but also providing you with partner hardware and comprehensive services.

Starting point is a thorough consultation and situation analysis to get an overview over your use case and specific requirements. Based on that, we customize our solutions to meet your needs, using Frontline components and features.

Jointly, we select the optimal hardware and deploy our Frontline solution in your factory plant or warehouse. In the productive phase, we provide a help desk and technical support with individual service level agreement to ensure your success.
